(HKEX: 1051).**

OUR COMPANY

G-Resources has adopted a diversifying business strategy. Its line of businesses includes principal investment business, mining and money lending.

The Martabe gold and silver mine is G-Resources Group's core mining asset. Martabe is located in North Sumatra, Indonesia and has a resource base of 7.4 million ounces of gold and 70 million ounces of silver. Production commenced at Martabe on 24 July 2012.

G-Resources has strong support from the Indonesian Central, Provincial and Local Governments and the communities of Batangtoru. The Company believes that mines should be developed, operated and decommissioned in a manner that is socially responsible. Caring for our people, the communities in which we conduct our business and the environment is our philosophy, and the core that underpins the way we conduct business.

OUR MISSION

G-Resources is seeking to grow gold production through exploration success on the large and highly prospective Contract of Work area at Martabe.

OUR VALUES

We strive to be a GREAT company in all of our operations and dealings with people. The GREAT values are the foundation of our Company, and provide a core commitment to achieve the best we can for all of G-Resources' stakeholders.

Production Forecast

285,000
ounces of gold

The production forecast for 2015 is 285,000 ounces of gold and 2.3 million ounces ("Moz") of silver.

The World Gold Council all-in sustaining costs are estimated to be between USD600/ounce and USD700/ounce for the full year. Again, demonstrating the robustness and highly competitive position of the Martabe Mine against global peers.

Exploration

7.4M / **70M**
ounces of gold / ounces of silver

60 diamond drill holes were completed for a total of 11,271 metres of core.

Total Resources are now 7.4 Moz of gold and 70 Moz of silver.

Government

**SUPPORT and
RECOGNITION**

In the first half of 2015, the Martabe Mine continued to enjoy the full support of all levels of Government – Central, Provincial and Regional. Renewal of licenses and permits is a normal ongoing requirement and the various government bodies have continued to support the Mine and provide the necessary approvals.

Community

**LOCAL
PROGRAMMES
well received**

The Company's social license is a key component of the Company's business success strategy. Harmonious relationships with local stakeholders continue to be achieved through positive communication strategies and the successful implementation of community development programmes in the key areas of health, education, local business development, infrastructure improvement and culture preservation. A new hospital clinic, as one of the three signature projects, was handed over to the local government in June 2015. A mosque was advanced to 90% of its construction. A bridge over the Batangtoru River was 70% completed. All corporate social responsibility programmes have been conducted in accordance with world standard sustainable development principles, with active engagement of the local community as the beneficiaries and in synergy with relevant government agencies.

CHAIRMAN AND ACTING CHIEF EXECUTIVE OFFICER'S STATEMENT

Operating performance at the Martabe gold and silver mine for the first six months of 2015 was excellent. 156,316 ounces of gold and 1,288,553 ounces of silver were produced and this was significantly ahead of budget.

Dear Shareholders,

The first six months of calendar 2015 saw continued operating and financial success for G-Resources. The Company generated gold and silver revenue of some USD211.0 million, an EBITDA of USD130.3 million and a Profit After Tax of USD39.1 million. At the end of June 2015, the Company had a very strong balance sheet with USD461.0 million held in cash and investments and no debt. In March 2015, the Company announced its first dividend of HK0.48 cents per share based on the full 2014 financial results.

Operating performance at the Martabe gold and silver mine for the first six months of 2015 was excellent. 156,316 ounces of gold and 1,288,553 ounces of silver were produced and this was significantly ahead of budget. During the period, production guidance for the full 2015 year was increased to 285,000 ounces of gold and 2,300,000 ounces of silver.

Safety performance continued to be outstanding with a LTIFR of 0.31; which compares very favourably with our world peers. Safety, security and general wellbeing of our employees and contractors is a priority for the Company. It is also very pleasing to note that, International Mining Industry Underwriters Limited ("IMIU"), in their recent underwriting report to insurers has classified Martabe Mine as Low risk category in their Insurability Matrix. The IMIU Insurability Matrix classifies mines into High risk, Moderate risk and Low risk after combining percentage of risk reduction adopted and IMIU risk exposure number.

Costs of production were very much under control and contained. The Martabe mine is very cost competitive by world standards due to its good scale, relatively high grades, open pit setting and access to nearby infrastructure in North Sumatra. All-in-Sustaining Costs ("AISC"), according to the World Gold Council standards, were a very low USD520/ounce of gold sold for the six months period.

The management team has continued to deliver on cost reduction via the Martabe Improvement Programme – a site wide programme with multiple ongoing individual projects aimed at increasing volumes and reducing costs and continuing to improve Martabe's already excellent world competitive position.

Capital expenditure for the six months was USD22.2 million – and this was mainly continuing to raise the Tailings Storage Facility ("TSF"). Over time, the TSF annual capital spend is likely to lessen as the TSF wall is raised enabling greater volumes of tailings to be stored per extra metre of wall height.

Expenditure on exploration in and around the Purnama Pit and other nearby orebodies and in the region was USD3.1 million for the six months: this was under budget. Some excellent results from exploration drilling were achieved which continues to provide confidence that Resources and Reserves will continue to increase and further extend the life of the Martabe Mine well into the future. At the end of June, six drill rigs were deployed in and around the existing deposits and on the 1,639 km² Contract of Work exploration area – targeting further gold and silver plus gold/copper discoveries.

The Company has a strong record of attaining and sustaining its “social licence” with the nearby communities and regional Governments. At Martabe, the Company maintains an active suite of programmes partnering with the communities on health and hygiene, training and education, agricultural advancement, environmental protection, infrastructure development, religious and cultural advancement and local business enterprise encouragement. G-Resources is proud of its achievements in this area and in May this year, published its first stand-alone Annual Sustainability Report.

During these past six years, we are indeed fortunate to have developed internal organisational strength with Mr Xiao Ma as Deputy CEO of the Company, Mr Tim Duffy as President Director of PTAR, the Indonesian operating subsidiary, and Ms Linda Siahaan, Deputy President Director of PTAR. This senior team plus the Indonesian operating and administration teams will continue to manage and drive the Company's superb operating performance at the Martabe Mine.

This strong operating and financial performance in these six months has been against the backdrop of weakening gold and silver prices. Gold averaged USD1,207/oz for the first six months of 2015 versus USD1,284/oz for the comparable period in 2014. At the end of July 2015, it continued its downtrend to under USD1,100/oz.

The Board has been very focused on what we can control to find opportunities to generate returns to our shareholders. Besides the volatile gold price, there are many uncertainties in global economics, whether the United States, Europe, China, or the developing countries. In light of the recent market environment, the Board sees the necessity to broaden the revenue base of the Group and has adopted a diversifying strategy.

In the last six months, we have invested approximately USD76.6 million in our Principal Investment Business. We have also commenced a Money Lending Business through our wholly-owned subsidiary, Global Access Development Limited (“Global Access”). Global Access is a licensed money lender in Hong Kong under the Money Lenders Ordinance (Chapter 163 of the Laws of Hong Kong).

We have seen some preliminary achievements in our new businesses and will continue to execute our diversifying strategy diligently.

Finally, on behalf of the Board of Directors, I would like to thank our employees and contractors for their contribution to the Company's excellent performance in the first half of 2015. And of course, we want to thank our shareholders for their continuing support for the Company.

I also wish to take this opportunity to thank our outgoing Chief Executive Officer, Mr Peter Geoffrey Albert, for his various contribution in the past few years and wish him all the best in his future endeavors.

MANAGEMENT DISCUSSION AND ANALYSIS

Operational Review

A. Martabe Gold Mine

Mining and Milling statistics are as follows:

	For the six months ended	
	30 June 2015	30 June 2014
Tonnes Mined Ore	2,202,000	2,948,000
Tonnes Mined Waste	4,275,000	4,252,000
Tonnes Milled	2,056,000	1,816,000
Gold Head Grade, g/t	2.89	2.76
Silver Head Grade, g/t	29.2	25.7
Gold Recovery, %	82.5	83.3
Silver Recovery, %	66.5	69.8
Gold Poured, ounces	156,316	134,937
Silver Poured, ounces	1,288,553	1,046,535

Mining

The mining team continues to perform very well. For cost control purposes and alignment of materials mined with tonnes milled, there was a reduction in the mining fleet in the current six months period ended 30 June 2015. Therefore, there was a decrease of total material mined of 6.5 million tonnes as compared to the corresponding period in 2014 of 7.2 million tonnes. With an improvement in the efficiency of the mining fleet, there was approximately 16% increase in materials mined than budget. The majority of the additional materials, being waste, were used to complete the TSF buttress supporting an ultimate RL360 crest elevation and ensuring a profile with an improved factor of safety on the western side. The crest of the TSF will be completed to RL330 by year end on target for tails containment and the rate of rise.

Ore mined was on budget matching the process throughput and maintaining the ROM stockpiles. Actual ore mined was 2.2 million tonnes (2014: 2.9 million tonnes).

The pit has progressed with an even profile from north to south, the elevations being RL380m to RL410m respectively, including a new central water management sump and extensions of the main northern. A new southern haulage was constructed to enable pit access from either end.

Ore delivery direct to the crusher has increased from 30% to in excess of 50% reducing stockpile rehandling costs, and placing a greater emphasis on in-pit blending for smoothing of grade and hardness.

At 30 June 2015, the stockpiles for ROM were 122,000 tonnes and remote combined low grade and mineralised waste were 2,556,000 tonnes. The reconciliation of ore mined/milled to ore reserve remains positive for the six months period ended 30 June 2015, and supports the current reserve upgrade drilling program with RC infill in high variability zones for a greater data density.

Processing

The process plant continued to improve for the first six months of 2015 with 2.1 million tonnes milled (2014: 1.8 million tonnes) at an average throughput rate of 525 tonnes per hour. Improvements to SAG mill operating strategy has enabled the mill to operate in cascade mode within some boundary conditions. A supervisory control system will be installed by the last quarter of 2015 that will provide further optimisation to milling performance. Treatment of the "Very Hard" ore component of the pit remains an issue and a hindrance to

achieving name-plate throughput rates. The Maintenance department continue to identify and re-design areas of high wear to further improve mill availability.

The last half of 2014 saw higher cyanide soluble copper values in the ore that presented initial issues with a high cyanide consumption and a lower precious metal recovery. During 2015, the copper level continued to increase and strategies were put in place to mitigate the impact.

A Geology-Mining-Processing collaboration was established with the objective of better identifying and communicating the existence of high copper zones, put in blending strategies and report back on actual mill performance. A cyanide dosing philosophy was also established during the first quarter of 2015 utilising existing equipment. This provides early recognition of high cyanide consumers and automatically adjusts cyanide addition. The first six months of 2015 have been subjected to high copper but managed to maintain at or above recovery predictions while optimising cyanide consumption.

B. Principal Investment Business

With the volatility of commodities prices and the global investment environment in 2014, the Group in late 2014 announced adopting a strategy to expand its business to include a Principal Investment Business. The goal of which is to identify investment opportunities and to invest in different industries, including mining, to provide better risk weighted return and capital value to the Group.

An Investment Management Committee (“IC”) has been established with the responsibilities for this Principal Investment Business. The IC identifies, reviews and considers for approval different investment opportunities taking into account the Group’s liquidity requirements, risk to capital and reasonable returns on investment with the risk taken.

During the period, the Group, as part of its Principal Investment Business, invested about USD76.6 million in listed and unlisted financial assets such as shares, bonds, other security investments and managed investment funds. The Group recorded realised and unrealised gain of USD3.7 million and interest income of USD2.6 million from the financial assets held by the Group. As at 30 June 2015, the Group was holding approximately USD172.6 million non-cash financial assets.

	30 June 2015	31 December 2014
	<i>USD'000</i>	<i>USD'000</i>
Listed shares	30,527	29,216
Listed bonds	55,366	40,908
Unlisted managed investment funds	47,104	37,550
Unlisted other security investments	39,554	–
Total	172,551	107,674

C. Money Lending Business

During the period, a Group’s wholly-owned subsidiary received a money lending license under the Money Lenders Ordinance (Chapter 163 of the Laws of Hong Kong). As at 30 June 2015, the fixed-rate loans receivable was USD6.5 million.

Business Review and Results

Below is a summary of the financial information:

	For the six months ended	
	30 June 2015 USD'000	30 June 2014 USD'000

Gold sold (ounces)	156,946	135,665
Silver sold (ounces)	1,308,951	879,643
Average gold price achieved (USD)	1,207	1,284
Average silver price achieved (USD)	16.4	19.7
Mine site production costs	57,610	66,618
Staff costs	6,425	7,318
Refining and bullion transportation costs	1,992	1,677
Inventory movement	3,157	(1,346)
	69,184	74,267
Depreciation	68,006	59,981
Total cost of sales	137,190	134,248
Royalties	1,206	1,024
Other taxes	1,140	1,636

For the six months ended 30 June 2015, the Group continued its strong operational and financial performances and achieved a net profit after tax of USD39.1 million (the six months ended 30 June 2014: USD34.3 million).

Revenue generated for the six months ended 30 June 2015 was USD213.7 million from the sale of 156,946 ounces of gold and 1,308,951 ounces of silver at an average selling spot price of USD1,207 per ounce of gold and USD16.4 per ounce of silver. For the previous six months (the six months ended 30 June 2014), revenue was USD191.4 million from the sale of 135,665 ounces of gold and 879,643 ounces of silver at an average selling spot price of USD1,284 per ounce of gold and USD19.7 per ounce of silver.

The Group's gross profit margin was 35.8% with a gross profit of USD76.5 million as compared to the six months ended 30 June 2014, being 29.9% and USD57.2 million respectively. The gross profit margin increased as compared to the previous six months mainly due to higher gold and silver sales and tonnes milled despite the average gold and silver price decreased. In addition, the cost of sales has only increased by USD2.9 million to USD137.1 million as compared to the previous six months of USD134.2 million.

The all-in sustaining costs ("AISC") for the six months ended June 2015 was USD520 per ounce of gold sold resulting in a reduction of 25.2% from the previous six months ended 30 June 2014 of USD695 per ounce of gold sold. The good cost results are a result of strong project fundamentals including favourable energy costs, the Company's focus on the MIP seeking to improve on ounces recovered and to reduce costs so as to increase the margin per ounce of gold produced and also some specific deferrals of expenditure during the six months

period, such as exploration as the geology group undertook a complete top to bottom review of the current knowledge base and considered the programme and strategy going forward.

Net Assets	1,222,995	1,196,678

Total assets were USD1,348.6 million (31 December 2014: USD1,297.9 million) an increase of USD50.7 million which was contributed by the profit from operations. Non-current assets were USD950.1 million (31 December 2014: USD901.4 million) an increase of USD48.7 million as the Group invested USD22.2 million in property, plant and equipment, USD76.6 million in available-for-sale investments, these increases offset by amortisation and depreciation charge of USD71.6 million, repurchase of available-for-sale investment by issuer of USD9.3 million and the remaining reclassification of available-for-sale investment from non-current assets to current assets of USD30.1 million. Current assets were USD398.6 million (31 December 2014: USD396.5 million) an increase of USD2.1 million mainly due to an increase in cash of USD26.1 million.

Net Asset Value

As at 30 June 2015, the Group's total net assets amounted to approximately USD1,223.0 million, representing an increase of USD26.3 million as compared to approximately USD1,196.7 million as at 31 December 2014. The increase in net assets was mainly due to the profit for the period of USD39.1 million and offset by the final dividend for the year ended 31 December 2014 of USD16.4 million.

Cash Flow, Liquidity and Financial Resources

	For the six months ended	
	30 June 2015 USD'000	30 June 2014 USD'000
CASH FLOW SUMMARY		
Net cash from Operating Activities	107,974	135,181
Net cash used in Investing Activities	(81,614)	(68,030)
Net increase in cash and cash equivalents	26,360	67,151
Cash and cash equivalents at the beginning of the period	260,750	200,575
Effect of foreign exchange rate changes	(211)	54
Cash and cash equivalents at the end of the period	286,899	267,780

The Group's cash balance at the end of June 2015 was USD286.9 million (31 December 2014: USD260.8 million).

The Group generated net cash inflows from operating activities for the six months ended 30 June 2015 of USD108.0 million, mainly from the sale of gold and silver in the period. Cash used in investing activities was USD81.6 million as USD76.6 million was invested in available-for-sale investment, USD22.2 million for property, plant and equipment (which included USD3.5 million in near mine exploration and evaluation) and USD3.1 million for regional exploration, which was offset by USD17.3 million from disposal of available-for-sale investments.

Material Acquisitions and Disposals of Subsidiaries and Associated Companies

There was no material acquisition or disposal of subsidiaries and associated companies during the period.

Exposure to Fluctuations in Exchange Rates and Related Hedge

The Group conducted most of its business in United States dollars ("USD"), Australian dollars ("AUD"), Indonesian Rupiah ("IDR") and Hong Kong dollars ("HKD"). The foreign currency exposure of HKD to USD is minimal as HKD is pegged to USD. The Group has exposure to foreign currency risk that is denominated in AUD and IDR.

In 2014, the Group entered into foreign currency forward contracts to sell USD and purchase IDR at a fixed rate in the normal course of business in order to limit its exposure to adverse fluctuations in currency exchange rates. Management will continue to monitor the Group's foreign currency exposure and consider other hedging policies should the need arise.

Business Outlook

Martabe Gold Mine

Spot gold and silver prices in 2015 continued to be volatile and fluctuated between USD1,081 to USD1,252 per ounce of gold and USD14.49 to USD17.10 per ounce of silver. At the time of writing, spot gold and silver at near the lows in 2015 and were USD1,119 per ounce and USD15.23 per ounce respectively. Whilst the Company does not forecast or provide guidance on metal prices, a conservative approach has been taken with respect to internal budgeting.

The production guidance for calendar year 2015 is 285,000 ounces of gold and 2.3 million ounces of silver at an anticipated AISC between USD600 and USD700 per ounce of gold sold. The Group will closely monitor costs and changes in the operating environment. It will continue to focus on operational improvements in costs and production and optimise its resources to enhance and create value for shareholders. The Group will continue its near mine and regional exploration programmes at Martabe.

Principal Investment Business

The Company will continue to evaluate suitable investments with a view to increase short and long term returns. As at 30 June 2015, the Principal Investment Business of the Group was holding approximately USD173 million of investments. The investments include Hong Kong listed equity securities, senior notes, unlisted investments funds investing in real estate properties, financial products and other security investments in information technology companies on consumer business and finance industry in China.

On 11 August 2015, the Group entered into a Sale and Purchase Agreement ("SPA") to purchase 100% of Supreme Racer for approximately USD101 million. Following completion of the SPA, Supreme Racer's main assets will be three office units located in Wanchai, Hong Kong with an aggregate gross area of approximately 46,477 square feet and an aggregate saleable area of approximately 34,857 square feet.

Money Lending Business

The Company will continue to expand its activities in money lending and will continue to balance between returns on interest rates and appropriate risks. At the time of writing, the Group advanced approximately USD26 million to various borrowers and received approximately USD6 million repayment.

Financial Services

On 7 August 2015, the Group announced that it intends to extend the scope of its existing principal activities to include the provision of securities brokerage services, placing and underwriting services, the provision of corporate finance advisory services, provision of margin financing, investment advisory and management services.

Hong Kong is the leading financial centre in Asia. With the Shanghai-Hong Kong Stock Connect programme launched in November 2014, as well as the upcoming Shenzhen-Hong Kong Stock Connect programme, the Board believes that there will be many business opportunities in the financial services sector.

The extension of the Group's scope of principal activities to include a wide range of financial services is to diversify its business scope with a view to broaden the Group's revenue base and to achieve better returns to the Company.

Human Resources

As at 30 June 2015, the Group had 21 employees in Hong Kong and 755 employees in Indonesia. Employees are remunerated at a competitive level and are rewarded according to their performance. Our Group's remuneration packages include a medical scheme, group insurance, mandatory provident fund, performance bonus and options for our employees.

According to the new share option scheme adopted by the Company on 18 June 2014, share options may be granted to directors and eligible employees of the Group to subscribe for shares in the Company in accordance with the terms and conditions stipulated therein.

EXPLORATION, RESOURCE AND RESERVE DEVELOPMENT ACTIVITIES

Figure 1. Martabe Mine Location.

Martabe Overview

The Martabe Gold Mine is located on the western side of the Indonesian island of Sumatra in the Province of North Sumatra, in the Batangtoru sub-district (Figure 1). Martabe is established under a sixth generation Contract of Work (“CoW”), which was signed in April 1997. The CoW defines all of the terms, conditions and obligations of both G-Resources and the Government of Indonesia for the life of the CoW.

Martabe has a resource base of 7.4 million ounces of gold and 70 million ounces of silver. Martabe commenced production from the Purnama pit in July 2012 and reached full production in 2013.

G-Resources is seeking to organically grow gold production through continued exploration success on the large and highly prospective CoW area. The Martabe Mine enjoys the strong support of the Indonesian Central, Provincial and Local Governments and the nearby communities of Batangtoru.

Operations

The operations team at Martabe consists of approximately 2,500 people, with a target of 70% local employment from the Batangtoru district and a further 25% national employees from around the Indonesian archipelago.

Safety

Safety performance at Martabe in the first half of 2015 has been good with a only one single incident of lost time injury. The safety performance at Martabe compares with the best performance in the industry. This outstanding performance is a direct reflection of quality of management and leadership across the Martabe Mine site.

Resource Development and Exploration

G-Resources continued its aggressive exploration programme on the Martabe CoW during the six months ending June 2015, with resource development and exploration programmes in the immediate vicinity of the Martabe Mine and exploration programmes in other areas of the CoW. A total of 56 drill holes for 8,913 metres was completed utilising a fleet of portable diamond drill rigs supported by a helicopter operation.

The drilling program is summarised in the table below:

PROSPECT	TARGET	NUMBER OF DRILL HOLES	TOTAL METRES
Near Mine Targets			
Barani	Western wall early stage target	11	1,536
Tor Uluala	Resource Extensions	15	1,966
Ramba Joring	Resource Extensions	25	2,971
Early stage targets	Deep target between the Ramba Joring and Tor Uluala Deposits	1	1,092
Purnama Reserve	In-pit Reserve development drilling with RC drill rig	60	5,904
Regional Exploration Targets			
Tango Papa	Martabe style epithermal gold	1	300
Tani Hill	Buried porphyry copper	3	1,048
Total		116	14,817

Resource Development Activity

Resource Development activity in the Martabe near mine district consisted of the following major activities:

- Diamond drilling and surface trenching for resource extensions at the Ramba Joring and Tor Uluala Deposits.
- Diamond Drilling of early stage targets at Barani and deep between the Ramba Joring and Tor Uluala Deposits.
- In-pit reverse circulation drilling at the Purnama Deposit, designed to test a positive reconciliation between the Reserve and processed ore.

Results

Drilling and trenching for Resource Extensions at the Ramba Joring and Tor Uluala Deposits has returned significant results, as previously reported on 29 July 2015 in the Hong Kong Stock

Exchange Release "G-Resources – Exploration Update". Some of the better results from these programmes were:

- 101.0m @ 1.93 g/t Au, including 21.0m @ 10.5 g/t Au (from additional drilling at the Ramba Joring Deposit)
- 138.9m @ 1.28 g/t Au (from additional drilling at the Tor Uluala Deposit)

Results from the early stage drilling completed in January to June 2015 are under evaluation.

Resource Estimation

No changes to the Mineral Resource Estimate are reported during the half year. It is anticipated that drilling in the second quarter and the remainder of 2015 will likely result in updated Mineral Resource Estimates for the Purnama, Ramba Joring and Tor Uluala deposits towards the end of 2015.

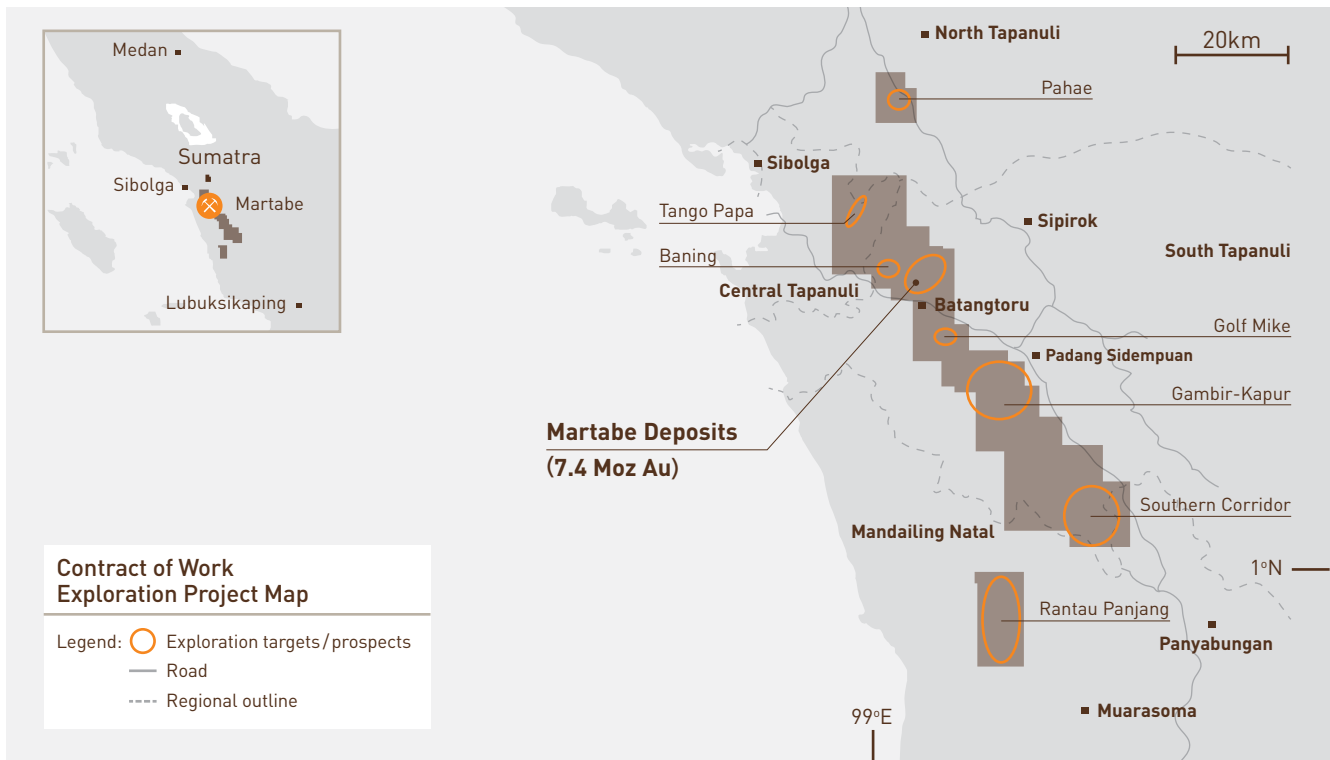

Figure 2. Martabe location, showing deposit and regional prospect locations within the CoW.

Martabe Contract of Work Exploration Activity

Exploration work including diamond drilling in the Martabe CoW was conducted at the Tani Hill prospect in Gambir-Kapur and the Tango Papa prospect. At Tani Hill, drilling intersected an alteration system consisting of silica-magnetite-chlorite-actinolite-pyrite-epidote with minor garnet, biotite and local traces of chalcopyrite. Two holes were completed for a total of 573.6 metres, with a third hole underway and at a depth of 330 metres by 30 June 2015. Results from this drilling have not all been received.

At Tango Papa, drilling intersected high sulphidation epithermal style alteration at Tango Papa, of similar style to the Martabe deposits. The first hole had reached depth of 300 metres by 30 June 2015. Assay results have not been received.

REPORT ON REVIEW OF CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

TO THE BOARD OF DIRECTORS OF G-RESOURCES GROUP LIMITED
(*incorporated in Bermuda with limited liability*)

Introduction

We have reviewed the condensed consolidated financial statements of G-Resources Group Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 20 to 37, which comprise the condensed consolidated statement of financial position as of 30 June 2015 and the related condensed consolidated statement of profit or loss, statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the six-month period then ended, and certain explanatory notes. The Main Board Listing Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in compliance with the relevant provisions thereof and Hong Kong Accounting Standard 34 "Interim Financial Reporting" ("HKAS 34") issued by the Hong Kong Institute of Certified Public Accountants. The directors of the Company are responsible for the preparation and presentation of these condensed consolidated financial statements in accordance with HKAS 34. Our responsibility is to express a conclusion on these condensed consolidated financial statements based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of Review

We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Hong Kong Institute of Certified Public Accountants. A review of these condensed consolidated financial statements consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed consolidated financial statements are not prepared, in all material respects, in accordance with HKAS 34.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

For the six months ended 30 June 2015

1. Basis of Preparation

The condensed consolidated financial statements have been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”) as well as with the applicable disclosure requirements of Appendix 16 to the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (“Hong Kong Stock Exchange”).

The condensed consolidated financial statements do not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual financial statements for the year ended 31 December 2014.

2. Principal Accounting Policies

The condensed consolidated financial statements have been prepared on the historical cost basis, except for certain financial instruments, which are measured at fair values.

The accounting policies and methods of computation used in the condensed consolidated financial statements for the six months ended 30 June 2015 are the same as those followed in the preparation of the Group’s annual financial statements for the year ended 31 December 2014. In addition, the Group has applied the following accounting policy for available-for-sale financial assets recognised during the current interim period:

Equity securities held by the Group that are classified as available-for-sale financial assets are measured at fair value at the end of each reporting period. When the fair value of unlisted equity investments cannot be reliably measured because (a) the variability in the range of reasonable fair value estimates is significant for that investment or (b) the probabilities of the various estimates within the range cannot be reasonably assessed and used in estimating fair value, such investments are stated at cost less any impairment losses.

In the current interim period, the Group has applied, for the first time, the following new interpretation and amendments to Hong Kong Financial Reporting Standards (“HKFRSs”) issued by the HKICPA.

HKAS 19 (Amendments)	Defined Benefit Plans: Employee Contributions
HKFRSs (Amendments)	Annual Improvements to HKFRSs 2010-2012 Cycle
HKFRSs (Amendments)	Annual Improvements to HKFRSs 2011-2013 Cycle

The application of the above new amendments to HKFRSs in the current interim period has had no material effect on the amounts reported in these condensed consolidated financial statements and/or disclosures set out in these condensed consolidated financial statements.

3. Segment Information

Information reported to the executive directors of the Company, being the chief operating decision makers, for the purpose of resource allocation and assessment of segment performance focuses on the nature of their operations and types of products and services provided. Each of the Group's business segments represents a strategic business unit that offers products and services which are subject to risks and returns that are different from those of the other business segments.

The Group has three (the six months ended 30 June 2014: two) operating business units which represent three (the six months ended 30 June 2014: two) operating segments, namely, principal investment business, money lending business and mining business (the six months ended 30 June 2014: securities trading and mining business). Since late 2014, the Group is actively engaged in investment and securities trading. The interest income and dividend income earned from financial products are presented as segment revenue under the principal investment business segment. Money lending business is newly commenced during the six months ended 30 June 2015.

7. Dividend

During the current interim period, a final dividend of HK0.48 cents per share in respect of the year ended 31 December 2014 was declared to be payable to the owners of the Company. The amount of the final dividend declared to be payable in the current interim period amounted to approximately USD16,402,000 (equivalent to approximately HKD127,000,000). Scrip dividend elections were offered to all shareholders.

8. Earnings Per Share

The calculation of the basic and diluted earnings per share attributable to owners of the Company is based on the following data:

	For the six months ended	
	30 June 2015 USD'000 (Unaudited)	30 June 2014 USD'000 (Unaudited)
Profit for the period attributable to owners of the Company, for the purposes of basic and diluted earnings per share	37,758	33,475
	Number of shares	
	30 June 2015	30 June 2014
Weighted average number of ordinary shares for the purposes of basic and diluted earnings per share	26,490,076,130	26,490,076,130

The computation of diluted earnings per share does not assume the exercise of the Group's outstanding share options as the exercise price of those options is higher than the average market price for shares for the six months ended 30 June 2015 and 30 June 2014.

9. Movement in Property, Plant and Equipment

During the period, the Group increased its property, plant and equipment by approximately USD22,242,000 (the six months ended 30 June 2014: USD29,616,000), of which USD4,957,000 (the six months ended 30 June 2014: USD9,467,000), USD17,282,000 (the six months ended 30 June 2014: USD20,140,000) and USD3,000 (the six months ended 30 June 2014: USD9,000) were attributable to additions of the mining properties, construction in progress for the construction of Martabe Gold Mine and furniture, fixtures and equipment respectively.

10. Exploration and Evaluation Assets

Exploration and evaluation assets represent the costs of acquiring exploration rights and expenditures in the search for mineral resources on an area of interest basis. The addition on the exploration and evaluation assets represents drilling, assaying costs, consultancy and advisory fee, staff costs and other expenditures incurred in the search for mineral resources during the period in mining areas where the existence of economically recoverable reserves could not be reasonably assessed.

Available-for-sale investments classified as current assets	–	39,419

Notes:

- (a) The balance represents the Group's investment in senior notes with principal amount of USD10,000,000 issued by a company with its shares listed on the Hong Kong Stock Exchange with maturity date of 18 May 2015 (the "Senior Notes Due 2015"). These notes were listed on the Singapore Exchange Securities Trading Limited, carried interest at a fixed rate of 11.75% per annum, payable semi-annually in arrears on 18 May and 18 November of each year, commencing on 18 November 2010. During the year end 31 December 2014, prior to the maturity, the issuer of the Senior Note Due 2015 offered repurchase of Senior Note Due 2015, it was accepted by the Group and was confirmed by the issuer. The cumulative loss previously accumulated in the investment revaluation reserve was reclassified to profit or loss and an impairment loss amounting to USD626,000 (the six months ended 30 June 2015: nil) was recognised in the profit or loss.
- (b) The balance represents the Group's investment in senior notes with principal amount of USD30,000,000 issued by a company with its shares listed on the Hong Kong Stock Exchange with maturity date of 22 January 2021 (the "Senior Notes Due 2021"). These notes are listed on the Singapore Exchange Securities Trading Limited, carry interest at a fixed rate of 8.125% per annum, payable semi-annually in arrears on 22 January and 22 July of each year, commencing on 22 July 2014.
- (c) During the period, the Group acquired senior notes with principal amount of USD30,000,000 issued by a company with its shares listed on the Hong Kong Stock Exchange with maturity date of 17 February 2020 (the "Senior Notes Due 2020"). These notes are listed on the Singapore Exchange Securities Trading Limited, carry interest at a fixed rate of 12% per annum, payable semi-annually in arrears on 17 February and 17 August of each year, commencing on 17 August 2015. During the period, the Group disposed of 8,000,000 units and realised gain of USD8,000 was recognised.
- (d) The Senior Notes Due 2015, Senior Notes Due 2021 and Senior Notes Due 2020 were measured at fair value. In the absence of quoted market price in an active market, the fair value measurements are derived from valuation techniques using the discounted cash flow model and the Hull-White term structure model that include inputs for the assets or liabilities that are not based on observable market data (unobservable inputs). During the six months ended 30 June 2015, an increase in fair value of USD815,000 (the six months ended 30 June 2014: increased in fair value of USD2,105,000) was recognised in the investment revaluation reserve.
- (e) The Group held three unlisted investment funds which are managed by financial institutions investing real estate properties, financial products and unlisted equity investments with an aggregate carrying value of USD47,104,000. The financial products include listed equity shares, straight bonds, convertible bonds, REITs, business trusts and derivatives. The fair value of the real estate properties is determined by the market transaction prices of similar properties of the relevant locations. The underlying financial products and unlisted equity investments are valued at quoted market prices in the open market or observable prices of comparable investments, or measured using valuation techniques in which significant input is based on observable market data. During the period ended 30 June 2015, an increase in fair value of USD2,053,000 is charged to the other comprehensive income.
- (f) The other security investments of the Group includes an investment with the carrying value of USD5,000,000 which was stated at fair value as at 30 June 2015. In the absence of quoted market price in an active market, the fair value measurement is determined by the financial institution using valuation techniques including earnings multiples (based on the budget earnings or historical earnings of the issuer and earnings multiples of comparable listed companies) and discounted cash flows. The valuation may be adjusted for factors such as non-maintainable earnings, tax risk, growth stage and cash traps as deemed necessary by the financial institution.

The remaining investments with an aggregate carrying value of USD34,554,000 represent six other security investments which were stated at cost less impairment loss as the range of reasonable fair value estimates are so significant that the directors are of the opinion that the fair value cannot be measured reliably. As at 30 June 2015, three out of these six other security investments accounted for 92% (the six months ended 30 June 2014: nil) of the aggregate carrying value, which the investment portfolio are focused in unlisted equity investments in information technology companies on consumer business and finance industry.

At the end of each reporting period, the Group revises its estimates of the number of options that are expected to be ultimately vested. The impact of the revision of the estimates, if any, is recognised in profit or loss, with a corresponding adjustment to the share options reserve.

19. Fair Value Measurements of Financial Instruments

THE FAIR VALUE OF FINANCIAL ASSETS THAT ARE MEASURED AT FAIR VALUE ON A RECURRING BASIS:

- the fair value of held for trading investments with standard terms and conditions and traded in active liquid markets are determined with reference to quoted market bid prices;
- the fair value of listed debt securities in available-for-sale investments is determined in accordance with the discounted cash flow model and Hull-White term structure model, the valuation technique and key inputs are detailed in note 11; and
- the fair value of unlisted managed investment funds and other security investment in available-for-sale investments are determined in accordance with the market value provided by the counterparty financial institutions.

THE FAIR VALUE OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES ARE NOT MEASURED AT FAIR VALUE ON A RECURRING BASIS:

- the fair value of other financial assets and financial liabilities (excluding held for trading investments and available-for-sale investments measured at fair value) are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

The directors consider that the carrying amounts of financial assets and financial liabilities recorded at amortised cost in the consolidated financial statements approximate their fair values.

FAIR VALUE MEASUREMENTS RECOGNISED IN THE CONDENSED CONSOLIDATED STATEMENT OF FINANCIAL POSITION

There is no transfer between Level 1, 2 and 3 during the periods. The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the input to the fair value measurements are observable and the significance of the inputs to the fair value measurement:

19. Fair Value Measurements of Financial Instruments (continued)

Notes:

- (a) The fair value of listed debt securities classified available-for-sale investments is determined in accordance with the discounted cash flow model and the Hull-White term structure model. The key inputs include those can be observed in the market in addition to unobservable inputs such as company specific financial information. The fair value of the available-for-sale investments is measured with the assumptions including discount rate, time to maturity, mean reverting rate and volatility. The lower the discount rate or shorter the time to maturity, the higher the fair value.
- (b) The fair value of unlisted managed investment funds and unlisted other security investment in available-for-sale investments are provided by the counterparty financial institutions. They are determined in accordance with the market value.
- (c) The fair value of held for trading investments with standard terms and conditions and traded in active liquid markets are determined with reference to quoted market bid prices.
- (d) The fair value of derivative financial liabilities, representing foreign currency forward contracts, are determined in accordance with discounted cash flow. Future cash flows are estimated based on forward exchanges rates (from observable forward exchanges rates at the end of the reporting period) and contracted forward rates, discounted at a rate that reflects the credit risk of various counterparties.

Purchase, Sale or Redemption of the Company's Listed Securities

During the six months ended 30 June 2015, neither the Company nor any of its subsidiaries purchased, sold or redeemed any of the Company's listed securities.

Compliance with the Corporate Governance Code

The Company has adopted the principles and complied with the Corporate Governance Code and Corporate Governance Report (the "CG Code") as set out in Appendix 14 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") for the six months ended 30 June 2015, except for the deviation as set out below:

Code provision A.4.1 stipulates that non-executive directors should be appointed for a specific term and subject to re-election. The existing independent non-executive directors do not have a specific term of appointment but are subject to retirement by rotation and re-election at the annual general meeting under the Bye-laws of the Company. As such, the Company considers that sufficient measures have been taken to ensure that the Company has good corporate governance practices.

Model Code for Securities Transactions by Directors

The Company has adopted the Model Code for Securities Transactions by Directors of Listed Issuers (the "Model Code") set out in Appendix 10 to the Listing Rules as its own code of conduct regarding directors' securities transactions. Enquiry has been made of all directors, and the directors have confirmed compliance with the required standard set out in the Model Code during the six months ended 30 June 2015.

Audit Committee

The Audit Committee, with terms of reference in compliance with the provisions set out in the CG Code, comprises three members who were all independent non-executive directors of the Company for the six months ended 30 June 2015. The Audit Committee has reviewed with the management the accounting principles and practices adopted by the Group and discussed the auditing, internal controls and financial reporting matters. The interim report for the six months ended 30 June 2015 has been reviewed by the Company's Audit Committee and the Company's auditors, Deloitte Touche Tohmatsu.
