

PAX powers the future of payment at Trustech 2017

(HongKong, PRC, 5th December 2017) PAX Global Technology Limited (HKSE stock code: 00327.HK), one of the world's leading electronic payment terminal solutions providers, exhibited a new generation of Smart POS devices and Smart ECR systems based on Android at the Trustech tradeshow in Cannes, France.

PAX continues to differentiate itself from other suppliers in the new Android terminal market by offering customers an open platform PAXSTORE solution that perfectly combines an advanced terminal management system with a modern appstore marketplace.

The company's E-Series integrated Smart ECR retail units and A-Series Smart POS terminals generated a lot of interest, as they are considered best in class for merchants to offer an omni channel payment experience and a platform for offering new services.

Andrew Wu, Vice President of PAX, said: "We were delighted to see so much visitor interest in our Android portfolio and we believe that PAX is well positioned to lead the payment terminal market into 2018 and beyond"

Mark O'Flynn, Sales Director at PAX, concluded: "We hosted a private PAX partner meeting the day before the Trustech, attended by some 30 companies from Europe, the Middle East and Africa, at which we show cased many new product models which we will be launching as part of our Smart payment strategy during the coming 12 months."
