Notes:

1. APPLICATION OF HONG KONG FINANCIAL REPORTING STANDARDS

In the current year, the Group has applied a number of new standards, amendments and interpretations (“new HKFRSs”) issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”), which are either effective for accounting periods beginning on or after 1 January 2007. The adoption of the new HKFRSs had no material effect on how the results for the current or prior accounting periods have been prepared and presented. Accordingly, no prior period adjustment has been required.

The Group has not early applied the following new standard, amendment and interpretations that have been issued but are effective on or after 1 January 2008 since the directors of the Company anticipate that the application of these standard, amendment or interpretations will have no material impact on the results and the financial position of the Group.

The fair values of the Group's trade payables at 31 December 2007 approximated to the corresponding carrying amounts.

MANAGEMENT DISCUSSION AND ANALYSIS

Business Overview

The Group is principally engaged in (i) exploitation and management of timber resources in the PRC; (ii) research and development, processing, manufacture, distribution, marketing and sales of a wide range of timber products and (iii) manufacturing and sales of electronic calculators and other electronic products and liquid crystal display units.

During the year ended 31 December 2007 (the “Year”), the Group recorded turnover of HK\$709.3 million, up 45% compared with approximately HK\$489.3 million last year. The Group’s net profit attributable to shareholders was HK\$392.7 million in contrast to net loss of approximately HK\$26.4 million last year.

The Group’s gross profit during the year recorded approximately HK\$127.1 million, representing an increase of 4.5 times compared with approximately HK\$23.1 million last year. Gross profit margin had increased to 17.9% (2006: 4.7%). The increase in gross profit margin reflects the contribution from the newly acquired timber business, which has high profit margin and ample profit growth potential.

Timber business

The Group had successfully diversified its business into timber resources and timber products manufacturing and trading business upon completion of acquisition of Green & Good Group Limited on 8 October 2007 and the operating results of the following approximately three months were already incorporated into the results of the Group during the Year.

During the Year, the Group has recorded a segment turnover of HK\$236.5 million, accounting for approximately 33.3% of the Group’s turnover (2006: Nil), which mainly arose from the timber logging and trading. The gross profit for timber business during the Year recorded approximately HK\$54.9 million (2006: Nil) and gross profit margin was 23.2% (2006: Nil).

Operating profit before the changes in fair value less estimated point-of-sale costs of biological assets for the timber business segment was HK\$28 million (2006: Nil). This well performance is due to the significant demand for the logs caused by expanded construction activities and continuing improvement of selling prices of the logs in the PRC.

Apart from the operating profit, the Group has also recorded a gain of HK\$263 million arising from the changes in fair value less estimated point-of-sale costs of biological assets. The management believes the growing demand for timber driven by strong economic growth in the PRC played a positive role in the valuation of the biological assets.

Electronic products business

During the Year, the Group's electronic products business segment recorded turnover of HK\$472.8 million, accounted for approximately 66.7% of the Group's turnover, down 3.4 % compared with the same segment of approximately HK\$489.3 million last year. The Group's electronic products business segment's operating profit was HK\$23.5 million in contrast to same segment's operating loss of approximately HK\$28.1 million last year.

The gross profit for electronic products business during the Year recorded approximately HK\$72.2 million (2006: approximately HK\$23.1 million), up 3.1 times compared with last year. Gross profit margin had increased to 15.3% (2006: 4.7%). During the Year, the Group's total production output of electronic calculators and other electronic products had decreased by approximately 11% compared with last year. The improved gross profit margin was mainly due to the fact that the Group had raised the products selling price generally during the Year and strengthened the control of production with an aim of improving the product quality. The Group had reviewed the products profile and more concentrated on high profit margin products. In addition, the Group had taken measures to improve the production efficiency and enhance the production planning control.

Electronic Calculators

During the Year, the sales of electronic calculators remained the Group's significant revenue generator, recording HK\$272.6 million or 38.4% of the Group's total turnover. (2006: sales of approximately HK\$306.0 million and 62.5% of the Group's total turnover). The decrease is mainly due to the Group had scaled down its production.

Other Consumer Electronic Products

During the Year, the sales of multifunctional water resistance watches and household telephones recorded HK\$62.8 million and HK\$53.4 million respectively, contributing 8.9% and 7.5% of the Group's turnover (2006: sales of multifunctional water resistance watches and household telephones were approximately HK\$57.3 million and HK\$40.1 million respectively, or 11.7% and 8.2% of the Group's turnover). The increase in sales of multifunctional water resistance watches and household telephones was mainly due to launching of more new models. The management expected these other electronic products would continue to play a more important role in the Group's electronic product portfolio in the future.

During the Year, the sales of electronic game cards recorded HK\$1.5 million or 0.2% of the Group's turnover (2006: HK\$3.6 million or 1% of the Group's turnover). The decrease in sales of electronic game cards was due to the reason that Group's customer had re-arranged its sales network and cut down its orders from the Group.

Liquid Crystal Display (“LCD”)

During the Year, the sale of LCD was HK\$42.2 million or 5.9% of the Group’s turnover (2006: sales of HK\$46.2 million or 9.4% of the Group’s turnover). The slight decrease in sales of LCD was partially due to keen price competition on STN-LCD and TN-LCD display units. Although the Group had upgraded its LCD production lines to include chip on glass (“COG”) production facilities, the development on COG was unsatisfactory and behind the Group’s schedules. Therefore, depending on the Group’s ability to gain more new customers on COG products, the Group may not further develop COG products in the future. The Group will continue to concentrate on the manufacturing and sales of TN-LCD and STN-LCD in the near term.

Corporate Development

On 8 October 2007, the Company had completed the acquisition from Superview International Limited 70% of the issued share capital of Green & Good Group Limited (Green & Good Group) at a total consideration of HK\$1.38 billion (“Acquisition”). The Green & Good Group’s sole asset is the entire equity interest in LEEKA Wood Company Limited, a wholly foreign owned enterprise established in the PRC, whose subsidiaries and itself are principally engaged in the (i) exploitation and management of timber resources in the PRC; and (ii) research and development, processing, manufacture, distribution, marketing and sales of a wide range of wood products.

The consideration of HK\$1.38 billion was satisfied by (i) HK\$200 million in cash (ii) HK\$250,311,150 by the allotment and issue of 556,247,000 consideration shares at HK\$0.45 per consideration share, credited as fully paid, payable to Superview; and (iii) the remaining balance of HK\$929,688,850 by the issue of the convertible notes at a conversion price of HK\$0.45 per conversion share to Superview.

Superview and the guarantors, namely Mr. Ho Kam Hung, Mr. Yiu Yat On and Ms. Qian Mingjin, jointly and severally undertake to the Company that:

- (1) the aggregate profits after tax shown in the audited consolidated accounts of Green & Good Group in accordance with Hong Kong GAAP compliance for the financial years ending 31 December 2007 and 31 December 2008 shall not be less than HK\$300 million and will compensate the Company for any shortfall between the guaranteed profits and the actual aggregate profits after tax shown in the audited consolidated accounts of Green & Good Group in accordance with Hong Kong GAAP compliance for the financial years ending 31 December 2007 and the financial year ending 31 December 2008;
- (2) the fair market value of net assets of Green & Good Group, to be assessed by an independent appraiser and to be confirmed in a valuation report, shall be not less than HK\$2,500 million.

During the Year, the Group's electronic products business had successfully returned to profit making from a loss in last year after implementing effective measures such as overall increase in selling price, improvement on controlling of production cost and scale down of production by concentrating on high profit margin products etc. Owing to the business environment had worsen as a result of appreciation of Renminbi and general increase in labour cost and raw material cost, the Group will continue to control the production costs and other appropriate measures to improve the production efficiency and profitability.

Employees and Remuneration Package

As at 31 December 2007, the Group had approximately 4,600 employees (2006: approximately 5,000 employees). The decrease in employees was attributable to scale down of production and outsourcing of certain labour intensive production procedures such as assembly. The remuneration package was based on their work performance, experience and the industry practice. The Group also participated in retirement benefits schemes for its staff in Hong Kong and the PRC.

Capital Expenditures

During the Year, the Group spent approximately HK\$11.1 million (2006: HK\$27.6 million) on acquisition of new production machineries, which was financed by internal cash resources.

Contingent liabilities

The Group did not have any significant contingent liabilities as at 31 December 2007 (2006: Nil).

Financial Review

Liquidity and Finance Resources

During the Year, the Group generally financed its operations with internally generated resources and banking facilities provided by its principal bankers in Hong Kong and the PRC. As at 31 December 2007, the Group had approximately HK\$413 million interest-bearing borrowings (2006: HK\$50 million), of which approximately HK\$406 million was floating-interest bearing and denominated in Renminbi with maturity within five years and the remaining was floating-interest bearing and denominated in Hong Kong Dollars. The Group's banking facilities were secured by corporate guarantees given by the Company and certain subsidiaries of the Company.

As at 31 December 2007, the Group's bank borrowings were denominated in Hong Kong dollars and Renminbi. The Group's sales and purchases were either denominated in Renminbi, Hong Kong and US dollars. Accordingly, the Directors consider the Group has no significant exposure to foreign exchange fluctuations in view of the stability of the exchange rates of Renminbi, Hong Kong and US dollars. During the year, the Group did not use any financial instrument for hedging the foreign exchange risk. However, for hedging of interest rate risk, the Group used interest rate swap which could effectively convert the floating interest rate bank loan to fixed interest rate. The amount of swap outstanding at 31 December 2007 was approximately HK\$6.7 million (2006: approximately HK\$13.3 million).

As at 31 December 2007, the Group had current assets of approximately HK\$501.6 million (2006: HK\$346.4 million) and current liabilities of approximately HK\$361.2 million (2006: HK\$163.1 million). The Group's current ratio had decreased from approximately 2.1 times as at 31 December 2006 to approximately 1.4 times as at 31 December 2007. The Group had total assets of approximately HK\$4,481.1 million (2006: HK\$583.8 million) and total liabilities of approximately HK\$1,544.5 million (2006: HK\$179.8 million), representing a gearing ratio (expressed as total liabilities to total assets) of approximately 34.5% as at 31 December 2007 as compared with approximately 30.8% as at 31 December 2006.

Prospects

The success of diversifying our Group's business into new areas of high-growth timber business helps the Group broaden its revenue base and sources of profit. The current outlook for the timber market in the PRC remains positive with continuous demand, although the economic growth in the PRC will slow down in the near future. The prices of the logs maintain at a higher level under the constrained supply and continuous demand. The Group will take advantage of the expected favourable pricing environment to maximize the potential value of its rich timber resources. Apart from its existing timber resources, with the availability of financial resources, the Group will take initiatives to seize opportunities to acquire new timber sources both in the PRC and overseas to enrich its timber reserves. As the timber business has tremendous potential, it will become a major revenue and profit growth driver of the Group in the future.

We expect the electronic calculators market will still be stable in 2008. However, high inflation rate in PRC, appreciation of Renminbi and new legislations on labour add pressure to our electronic product manufacturing business. Since the Group had difficulties in passing all the cost pressure to our customers, the Group will continue to implement effective measures such as more reasonable adjustment of the product mix, reduction of inventories level and tighten the control of the production cost.
